

## IPC J-STD-001 Requirement for Soldered Electrical & Electronic Assemblies Space Addendum New Revision F

The J-STD-001 training is a certified training programme which covers materials & process requirements for soldered assemblies that need to survive the vibration and thermal cyclic environments of space.

Topics covered:-

- Course objectives
- Introduction
- Differences in requirements between J-STD 001 and the J-STD 001 Space Addendum

This training will identify and review each section of the addendum providing additional requirements over those published in the J-STD 001 to ensure reliability of assemblies in the space environment.

On successful completion of the end/module exam the student will receive a J-STD-001 Certified Trainer/Certified IPC Specialist certificate which is valid for two years.

Course duration 1 day.

**Prerequisites:- CIT & CIS students must be certified to J-STD 001**
